PROFILE

Passionate Embedded Systems Developer and first-year ECE student at the Academy of Technology, focused on building scalable and reliable embedded solutions. Experienced in system-level design, hardware-software integration, real-time performance, and IoT innovation. Proven track record in competitive engineering events with multiple national and institutional awards.

ACHIEVEMENTS & AWARDS

Winner — Paper Competition | FOSET 2026 — 2026

Winner — Model Competition | FOSET 2026 — 2026

Best Beginner Team | View Integreta — 2026

1st Place — Maze Runner | AOT Fiesta 2026 — 2026

TECHNICAL SKILLS

Embedded & Hardware

ESP32 / Arduino

PCB Design

HC-SR04 Sensor

Servo Control

TTP223 Touch

Programming & Tools

Python

C / C++

Ubuntu / Linux

ESP-IDF

Debugging

IoT & Web

WebSocket

REST API

Node.js

NTP Sync

State Machine

FEATURED PROJECT

Smart Medicine Box | ESP32-Based IoT Health System

- ▶ 5-state finite state machine: IDLE → ALERTING → DISPENSING → CONFIRMED / MISSED
- ▶ NTP time sync (IST), HC-SR04 ultrasonic presence detection, servo-controlled lid
- ▶ TTP223 touch sensor for dose confirmation with buzzer alerts
- ▶ WebSocket + REST API with Node.js live dashboard — real-time state badges & event logging

EDUCATION

B.Tech — Electronics & Communication

Academy of Technology, MAKAUT
2025 - 2029 (2nd Semester)

Secondary School — Class X to XII

Uttarpara Government High School
2022 - 2024
